California Assembly Bill ("AB") 1305 Voluntary Carbon Market Disclosures

This disclosure is published to comply with California AB 1305 on behalf of Olin Corporation ("Olin") and its subsidiaries for the fiscal year of 2025.

Olin does not currently market, purchase, sell, or use voluntary carbon offsets as outlined in AB 1305.

Olin has a Scope 1 and 2 greenhouse gas ("GHG") emission reduction target of 35% from the baseline year of 2018 by 2030. Several reporting protocols and guidance documents like the GHG Protocol were used to develop and compute the reported GHG emissions. Additional information regarding our progress towards our 2030 goal can be found within Olin's Sustainability Report. Published GHG emissions data have not been verified by a third party.

Olin utilizes a third-party vendor to perform Life Cycle Assessments (“LCAs”) in accordance with ISO 14040 and 14044 in the software tool, Umberto 11. Where primary data was not available, data from Ecoinvent (v.3.12) was used. Product carbon footprints (“PCFs”) issued by Olin are prepared in accordance with ISO 14040 and 14044.

Epoxy resin products manufactured in Stade, Germany for Olin Sustainaline® are ISCC (International Sustainability and Carbon Certification) PLUS certified.
