

SHARING SAFETY AND HANDLING EXPERTISE

This sustainability story is one of many that shows how Olin products, technologies, ideas, and people are having a positive impact on our world.

SUSTAINABILITY CHALLENGE

- The safe delivery and use of Olin's products require proper training and equipment throughout the supply chain, but staying current with best practices and regulatory requirements can be a challenge.

OLIN'S SOLUTION

- Olin meets or exceeds industry guidelines, making sure that customers receive detailed product handling instructions.
- Globally, Olin provides printed literature and Product Stewardship Manuals on how to safely store and handle our products.
- For certain products, Olin conducts periodic chemical safety training events for customers and distributors, free of charge, at convenient locations.
- Olin conducts assessment programs to train and validate – before or at delivery – that customers can safely receive and handle our products.

POSITIVE IMPACT

- From free safe handling seminars in North America, to global customer assessments, to safety data sheets and product stewardship literature, Olin helps customers in a variety of ways to ensure the safe handling of our products.
- Olin's resources, technical experts, customer site assessments, and training help protect against chemical spills, mixes, and accidental releases.
- Our global teams share learnings from customer assessment.

DID YOU KNOW?

Olin helps customers in multiple ways to assure safe handling of our products.
