

## ENERGY AND NATURAL RESOURCE MANAGEMENT POLICY

Energy and Natural Resources are critical to Olin's Operations. As a good and responsible steward of the environment, Olin is committed to the stewardship of energy and natural resources.

Olin's executive management team champions, leads, and supports the ongoing efforts to reduce the use of energy and other natural resources:

- Developing and implementing a comprehensive, systematic, and coordinated Energy and Natural Resource Management Plan, including metrics for all locations globally.
- Evaluating and implementing actions to reduce energy and natural resource usage and improve efficiency.
- Engaging all key stakeholders in the development and execution of the plan.
- Measuring the plan's effectiveness in driving continuous improvement in energy and natural resource conservation and cost reduction.

Our Energy and Natural Resource Management System is an integral part of the company's strategy. All employees have responsibilities within the system to sustain our drive toward reducing our use of energy and natural resources.
